

BRIEFING NOTE

TO: Board of Directors

FROM: Amy Stein, Deputy Registrar

DATE: March 1, 2022

SUBJECT: College Performance Measurement Framework

☐ For Decision ☒ For Information ☐ Monitoring Report

Purpose:

To present a status update on the College Performance Measurement Framework 2021 Report.

Background:

The College Performance Measurement Framework (CPMF) was implemented by the Ontario Ministry of Health (Ministry) in 2020 to measure in a standardized and consistent manner how well the colleges are executing their mandate.

The primary aim of the CPMF is to provide the Ministry with information that will:

- Strengthen accountability and oversight of Ontario's health regulatory colleges; and
- Help colleges improve their performance

The inaugural CPMF report covered the 2020 reporting year and was submitted on March 31, 2021. In November 2021 the Ministry released an updated version of the report for the 2021 reporting year.

Highlights from the 2021 reporting year include:

- Approval by the board of a pre-election and pre-appointment competency framework and screening process.
- Approval by the board of a process for third party external effectiveness evaluations.
- Continued collaborations with system partners to align oversight of the profession and to respond to changing public and societal expectations.

A draft report will be circulated to the board in mid-March for comments and feedback before the final report is submitted to the Ministry on March 31. The Ministry is expected to post a summary report on its website later in the year that will capture the colleges' CPMF results at a system level.

Action Required:

This update is being provided for information only.
